Frozen model
Teacher-assisted
Persistent artifact
Calibrated policy
(a) Memory bank construction
TRAIN ONLY
Training inputs
Frozen reasoner: 1 greedy + 7 samples
Trajectory review and paired contrasts
Experience atom induction
Method-centric semantic grouping
Memory card synthesis and qualification
Primary bank: selector metadata + native prefix KV
BANK
(b) Selector calibration
VALID ONLY
Validation inputs
Semantic Top-K and exclusion-aware reranking
Baseline and candidate KV execution
Paired utility labels: gain, harm, neutral
Ridge utility model + abstention threshold
POLICY
(c) Online memory use
TEST / DEPLOY
New input
Frozen semantic retriever + applicability reranker
Expected utility scoring
max utility > threshold?
yes
no
Selected native-prefix KV
no_memory
Frozen reasoner
Output
Frozen Primary Bank
